Surat, Gujarat, India | +91 7041089834

Software Developer with hands-on industry experience at Aaditya Techtronics, contributing to AI-powered lead generation and employee management solutions. Proficient in FastAPI, React Native, PostgreSQL, and TypeScript, with experience building scalable REST APIs, backend systems, and AI-powered applications. Passionate about backend engineering, artificial intelligence, and developing production-ready software.

Education

Veer Narmad South Gujarat University 2023 – 2026
Bachelor of Computer Applications (BCA) SGPA: 8.73

Experience

Software Developer *June'26 - present*

AI-Powered Lead Generation Platform (LG-Agent)

Built

- Developed an AI-powered lead generation platform using react, FastAPI, PostgreSQL, SQLAlchemy, and Playwright and chromium .

Business Problem

- Manual lead collection was slow, repetitive, and produced inconsistent business data.

Business Impact

- Automated lead discovery, improved lead quality through verification and enrichment, and reduced manual effort for the sales team.

Employee Management System (EMS)

Built

- Developed a cross-platform Employee Management System using React Native (Expo), TypeScript, FastAPI, and PostgreSQL.

Business Problem

- Attendance and leave management were manual, making employee tracking inefficient.

Business Impact

- Digitized attendance with GPS-based check-in/out, streamlined HR operations, and enabled centralized employee monitoring and reporting.

Projects

Role-Based RAG AI Chatbot for Secure Document Retrieval

Developed an AI chatbot using Retrieval-Augmented Generation (RAG) to answer internal organizational queries.

Key contributions include:

- Implemented role-based document retrieval using FAISS vector similarity search
- Integrated Mixtral LLM via Groq API to generate contextual responses
- Built an interactive Streamlit interface for querying departmental knowledge

MERN Quiz Application (Team Project)

Built a full-stack quiz web application using the MERN stack.

- Developed APIs to manage quiz questions and user responses
- Built dynamic user interface components for quiz interaction and score calculation

Cloud Drive – Self Hosted Storage System (Team Project)

Collaborated with a team to build a browser-based cloud storage web application.

- Implemented file upload handling and folder management features
- Added file previews for documents, images, and videos
- Integrated MySQL database for storing file metadata

Technical Skills

Programming: Python, React

Frameworks & Technologies: FastAPI, React Native (Expo), SQLAlchemy, Playwright, REST APIs

AI / Machine Learning :Retrieval-Augmented Generation (RAG), FAISS, Sentence Transformers, Groq API

Databases: PostgreSQL

Web Technologies: HTML, CSS

Tools: GitHub, VS Code

Languages

English, Hindi
